## NEW DRY READYMIX NEW

*Everything for the architect, the structural engineer and the contractor in one bag.*

- We manufacture our DRY READYMIX with sands from East Anglia and natural hydraulic lime binders from Europe's most technologically advanced producer, St Astier
- We can tailor a DRY READYMIX to match your requirements for colour, strength, and other physical properties
- The following are our most commonly used mixes and are available as stock items. Each one comes with all the physical and mechanical data that architects, engineers and surveyors require for building design calculations

### DRY READYMIX FOR CONSERVATION

Product	Details	Weight	Unit Cost ex VAT

		1000kg	£360.00

### DRY READYMIX FOR NEW BUILD

We can tailor our new-build mortars to suit the requirements of any given job; accelerating build rates, eliminating movement joints and supplying 28 day figures for compressive and flexural strength, as well as elasticity. All of our new-build mortars come with an integral plastisizer for an 'easy-off-the-trowel' mix.

Product	Details	Weight	Unit Cost ex VAT
